EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The paragraph beginning on page 2, line 34, and ending on page 3, line 5 of the specification is replaced with:

As indicated above, use is made of first order thermal models to determine the temperature of electrical conductors, such as for instance the temperature in various parts of an induction motor. These principles are set out in a paper by [[S.A.]] S.E. Zocholl and Gabriel Benmouyal entitled "Using Thermal Limit Curves to Define Thermal Models for Induction Motors", *Proceedings of the 28th Annual Western Protective Relay Conference, Spokane, Washington, October 2001*. The first order thermal model for protection of a power line is expressed as first order differential equation:

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

Regarding claim 10, the prior art fails to teach the default solar heating value, the longitude of time standard, the longitude and latitude of the conductor, the temperature coefficient of the AC resistance, the thermal heating capacity, the thermal resistance to

the ambient temperature, the estimated offset temperature, the high and low temperature thresholds, and the conductor initial temperature as being variables in a thermal model for a power line, in combination with the other limitations in the claim.

Regarding claim 11, the prior art fails to teach the heat power supplied to a power conductor to be $=I^2 \cdot (R_{ac}) + (T_C - 25) \cdot R_{delt} + Q_{sun}$, in combination with the other limitations in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ann T. Hoang, whose telephone number is 571-272-2724. The examiner can normally be reached Mondays through Fridays, 8:00 a.m. to 5:00 p.m.
